Death Breaks Link With Early History

A link with an historic incident that was one of the highlights of the operation of the Zig Zag railway system above Lithgow was broken today with the passing of Mrs. Mary Crowle, of Mort Street, Morts Estate.

The late Mrs. Crowle, a native of this district, was a daughter of the late Mr. George Featherstone, who was the driver of an engine which was derailed and left hanging over a cliff on the Zig Zag.

A photograph of the engine hanging partly in space is now in the possession of the Lithgow Historical Society and it was suggested that an old model engine should be returned to the scene as a tourist attraction.

Born at Wallerawang 78 years ago, the late Mrs. Crowle had been in ill-health for some time and her passing was not unexpected.

She lived at Rydal until her marriage and afterwards took up residence in Morts Estate, where she had lived ever since.

A keen gardener, she took a personal interest in the railway service and could recount many tales of the development of this important phase of railway history in N.S.W. At the same time, her friendly nature and generosity in helping friends and neighbors in times of trouble endeared her to

all who knew her.

Her husband predeceased her 2½ years ago and a son, Samuel, was killed in a mining accident in the Oakey Park Colliery in 1932.

She is survived by one daughter, Mary (Mrs. Holmes, of Lithgow) two sons, John (of Warrawong) and James (of Lithgow) to whom sympathy will be extended. She is also survived by one sister, Mrs. Watson, of Caringbah.

The funeral has been set down for tomorrow, being timed to leave St. Patrick's Church after a service at 2.30 p.m. for interment in the Lithgow Cemetery.

Godfrey Smith has charge of funeral arrangements.

CONCRETING

Dismantle a discarded electric iron, screw the handle to a flat piece of wood for use as a trowel for small concreting jobs, and bolt the iron's base to your work bench to make a small anvil.
